

How To Download And Install FastCAM® Updates

Please follow this step by step guide to download and install FastCAM updates. An update link to will be provided to you by the support team at FastCAM. If you do not have an update link at this stage please contact your local support team for assistance.

1. **Click** the update link that will have been sent to you by email from FastCAM support. The link should open your default web browser and begin downloading the update. If clicking the link does not start the automatic download **copy and paste** the link text into your web browser. This will begin the automatic download.
2. If step 1 has been followed correctly the update file will have been downloaded. Please open the file by **clicking twice**.
3. The next step is to select the 3 files, **right click and copy**.

We want to paste the files into the FastCAM directory located on your locale drive
e.g. C:

Windows 64bit - C:\Program Files (x86)\FastCAM

Windows 32 bit - C:\Program Files\FastCAM

4. If step 3 is correctly followed you will be asked if you want to replace the files, **click yes** as we want the newly updated FastCAM files to override the previous out of date files.
5. UPDATE COMPLETE. Please open and continue using FastCAM.
